Table 1g

Modelled percentage of the adult population vaccinated for SARS-CoV-2 by age, England

14 December 2020 to 18 July 2021

	Age 50 - 59	Age 60 - 64	Age 65 - 69	Age 70 - 74	Age 75 - 79	Age 80+
Weekly period	Modelled % of people who have been fully vaccinated	Modelled % of people who have been fully vaccinated	Modelled % of people who have been fully vaccinated	Modelled % of people who have been fully vaccinated	Modelled % of people who have been fully vaccinated	Modelled % of people who have been fully vaccinated
15 February 2021 to 21 February 2021	1.1	0.6	0.5	0.6	1.1	17.0
22 February 2021 to 28 February 2021	1.7	0.9	0.6	0.7	1.4	16.8
01 March 2021 to 07 March 2021	2.1	1.2	0.7	1.4	2.6	19.6
08 March 2021 to 14 March 2021	3.0	2.3	1.3	3.0	4.5	24.9
15 March 2021 to 21 March 2021	4.0	4.1	2.2	4.8	7.9	30.7
22 March 2021 to 28 March 2021	6.8	5.9	4.6	8.3	14.1	41.1
29 March 2021 to 04 April 2021	10.2	9.6	7.9	17.1	33.2	64.2
05 April 2021 to 11 April 2021	13.8	12.2	9.8	24.5	48.8	76.0
12 April 2021 to 18 April 2021	16.8	16.3	17.6	45.2	73.7	91.7
19 April 2021 to 25 April 2021	21.7	19.5	27.0	66.0	92.4	96.5
26 April 2021 to 02 May 2021	25.4	26.1	46.3	88.1	97.1	98.2
03 May 2021 to 09 May 2021	31.5	30.2	70.1	95.3	97.9	97.9
10 May 2021 to 16 May 2021	40.7	41.7	86.1	97.7	98.5	98.5
17 May 2021 to 23 May 2021	48.7	59.0	94.7	98.2	98.7	99.2
24 May 2021 to 30 May 2021	65.3	78.0	96.9	98.6	99.0	99.1
31 May 2021 to 06 June 2021	78.3	91.4	97.0	98.9	98.5	99.0
07 June 2021 to 13 June 2021	88.6	95.5	97.6	98.9	98.6	99.0
14 June 2021 to 20 June 2021	93.2	97.0	98.0	98.9	98.8	99.1
21 June 2021 to 27 June 2021	95.9	97.2	98.1	98.9	98.9	98.9
28 June 2021 to 04 July 2021	95.9	97.1	98.0	98.8	98.7	98.8
05 July 2021 to 11 July 2021	96.2	97.4	98.2	98.8	98.8	98.9
12 July 2021 to 18 July 2021	96.3	97.5	98.0	98.8	98.8	99.0

Office for National Statistics – Coronavirus (COVID-19) Infection Survey

Notes:

1. All results are provisional and subject to revision, due to a difference in the population denominator used to calculate the percentages, or any unadjusted for biases in our sample. Results are produced just from ONS self-reported records of vaccination.

4. This analysis is based on statistical modelling conducted by our research partners at the University of Oxford.

5. The method combines a statistical modelling approach with population information used in standard population weighting.

6. As this is based on Bayesian analysis, the appropriate uncertainty measure to use is credible intervals rather than confidence intervals. However they can be interpreted in the same way.

7. The England population used in this analysis relates to the community population aged 16 years and over. It is not the same as the total population of England as reported in our mid-term population estimates.

8. The denominators used are the total people in the sample at that particular time point, then it is post-stratified by the mid year population estimate.

9. Please see our methods article for more methodological information on the COVID-19 Infection Survey.

<https://www.ons.gov.uk/peoplepopulationandcommunity/healthandsocialcare/conditionsanddiseases/methodologies/covid19infectionsurvey/pilotmethodsandfurtherinformation>

10. Modelled estimates for fully vaccinated adults are not available before 15 February 2021
